

**EMERGENCY  
REPORTING®**

The Most Trusted Fire & EMS Records Management Solution

# North Dakota (ND NFIRS) Package

## Complete one report, not two, with this free state-wide solution for North Dakota

Emergency Reporting (ER), on behalf of the North Dakota Forest Service-NDSU and the North Dakota State Fire Marshal's Office, is proud to offer North Dakota Departments a free, web-based NFIRS reporting software to report their incidents directly to the State Fire Marshal's Office and U.S. Fire Administration. Fire departments have the option to use other third party software at their discretion, but only Emergency Reporting is free to all users in your agency or department.

In partnership with the North Dakota Forest Service, ER has fully integrated the state wildland fire reporting requirements within the state NFIRS reporting solution. **This means that only one report will need to be done to meet both of these organization's requirements.**

Emergency Reporting is a Cloud-based system so you can access your data online any time, from anywhere. With unlimited concurrent users, automatic system updates and instant database backup, managing your reporting has never been simpler. Our dynamic NFIRS Reporting tool makes completing incident reports quick and easy: **only fill out the fields required based on incident type.**

To get your department set up:

1. Designate at least one administrator from your department.
2. Have that person fill out and submit a form available at <https://explore.emergencyreporting.com/ndnfirs-sign-account/>, or click on the "Sign Up for Your Account" button at <https://explore.emergencyreporting.com/product/north-dakota-nfirs/>.

Emergency Reporting has a full suite of station management tools for Fire and EMS. View our available upgrades to find out how you can supercharge your system by visiting [www.emergencyreporting.com](http://www.emergencyreporting.com).

Partial funding for this project is made available through support from the USDA Forest Service State and Private Forestry Program.
